

VISION SCREENERS

Honeywell

As the market leader, Honeywell has developed the new Titmus VSeries™ of vision screeners.

Vision Screening Products

A Honeywell predecessor set the standard for vision screening instruments in 1959 with the introduction of the OV7 model vision screener. Often referred to as the “Titmus,” the older OV7 model, as well as the later-generation Titmus2, are still in use in many industrial locations, optical practices, and schools nationwide. As the market leader, Honeywell has developed the new Titmus VSeries™ of vision screeners, which are ergonomically-designed, precision-built stereoscopic instruments providing precise and prompt measurement of visual performance. The screeners are engineered for accuracy, validity and reliability of the test results, with emphasis on convenience and ease of administration.

What is Vision Screening?

Vision Screening is an efficient, practical and economical process to increase safety and productivity. A vision screener provides benefits to both employees and employers. It provides the employer with knowledge for proper selection and placement of employees leading to better quality, improved productivity and fewer accidents. In addition, employees benefit from improved vision which allows them to do a better job, experience less eye fatigue and possibly lead to early detection of pathological conditions.

The Next Generation of Premium Vision Screening

The Titmus VSeries™ family of vision screening instruments features an ergonomic design for patient comfort, standardized test illumination and an integrated handle for ease of transport. All models in the Titmus VSeries family combine a variety of vision screening tests like visual acuity, binocularity, color and depth perception, muscle balance, astigmatism and peripheral vision.

Model Features	Titmus V4	Titmus V3	Titmus V2
Membrane Control Panel	●	●	
Built-In Membrane Switches			●
Electronic Pointing System		●	
Ergonomics (Height Adjustment)	●	●	●
New Fluorescent Light Source	●	●	●
Portability	●	●	●
Soft Foam Headrest	●	●	●
Head Positioning Sensor	●	●	
Peripheral Vision Testing	●		●
Test Slide Advance/Reverse	Automatic	Automatic	Manual
Night Vision Testing	●		
Carrying Case (Soft-Sided)	Optional	Standard	Optional
