

TURN OFF BLUE LIGHT HAZARDS WITH THE AVATAR BLUE BLOCKER

Help mitigate the risks of exposure to blue light with the Avatar Blue Blocker safety eyewear

Eyesight is a precious gift that needs adequate protection on and off the job. Our diverse safety eyewear offering has glasses that are specially designed to protect against the specific risks of your industry. A good example is the Avatar Blue Blocker which helps to mitigate hazards presented by exposure to blue light, especially tackling blue light coming from LED light bulbs or LED overhead lighting.

HEALTH ISSUES LINKED TO BLUE LIGHT EXPOSURE

Eye fatigue

In the long run this can potentially lead to more severe health issues.

Macular degeneration

Blue light causes overproduction of a protein substance that could result in loss of vision.

Insomnia

Prolonged exposure to blue light at night can disrupt the circadian rhythm.

Increased risk of depression

Research done by Harvard University concluded that extended exposure to blue light could increase chances of depression

HOW DOES THE AVATAR BLUE BLOCKER HELP

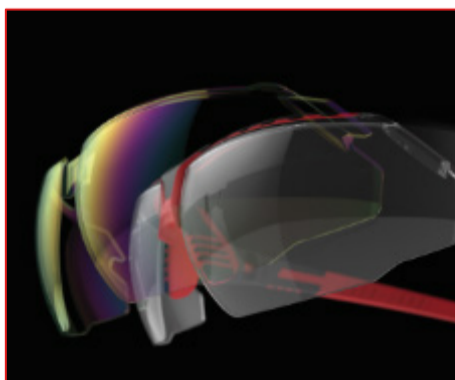

- The new Avatar Blue Light safety glasses filter blue light without impacting the visible light range.
- They offer 54±3% absorption of high energy blue light from 380nm – 450nm, while maintaining a VLT (visible light transmission) of 88% on average.
- In addition, their lenses provide 99.9% protection from UV light.
