### NANOlite® Technology

Improved **NANOlite®** footbed features moisture wicking characteristics and improved softer materials which provide additional cushioning and comfort. Increased perforations enable better breathability and the 3-layer structure promotes lower leg circulation reducing worker fatigue.

### NATUREform® Type 1 Toe Cap

Oliver **NATUREform®** toe caps have a wide profile shape to suit your foot and are padded with a latex cushion liner to ensure toes are comfortable and not in contact with the cap. Oliver boots with **NATUREform®** caps are licensed to the Australian Standard AS 2210.3.

### COMFORTcushion® Impact Absorption System

Oliver's unique **COMFORTcushion®** uses a combination of cellular urethane and **PORON®** performance cushioning to protect the heel and ball of the foot, providing superior cushioning and shock absorption at the heel. This constant impact absorption helps reduce foot, leg and lower back fatigue.

### PORON® XRD™ Metatarsal Guard

**PORON® XRD** is not only comfortable, flexible and lightweight but frees you of rigid, bulky and constricting padding. On impact, the **PORON® XRD** high performance molecules create a unique protective shield that absorbs up to 90% of the most intense force\* - hit after hit.
