

REDUCE NOISE WITH A PRO

Enable workers' critical communication, enhance their situational awareness and protect them from harmful noises.

Impact In-Ear PRO

Honeywell
HOWARD
LEIGHT

TINY DEVICE, BIG IMPACT.

Noise levels in industrial work environments can pose a serious threat to workers' hearing and well-being. The need for environmental awareness and critical communication makes it a top priority for businesses to protect workers' hearing while ensuring they can hear important communications on the job. Our Impact In-Ear PRO headset incorporates features that meet all those needs while providing the following benefits:

A COMFORTABLE SOUND

The Impact In-Ear PRO is certified hearing protection that looks like a personal headset. The minimalist design and light weight make the Impact In-Ear PRO easy to use while its flexible, moldable ear hooks provide a secure and comfortable fit for all-day wear. The headset features noise-attenuating silicon ear tips, widely considered to be the most comfortable option available, and comes with a compact travel case that includes a variety of earplug sizes.

A CERTIFIED SOUND

With an SNR 30dB noise reduction rating, our headset provides EN 352:2020 certified hearing protection that delivers industry leading Hear-Through. The Impact In-Ear PRO is compatible with other personal protective equipment (PPE) and can be worn in combination with a visor or with a mask and with any hard hat available on the market. Plus, certain models are available with Bluetooth® 5.0, which enables workers to connect with devices and helps increase communication efficiency.

A SAFE SOUND

With Honeywell's Impact In-Ear PRO you can be sure the volume stays at a safe level for your employees. Our headset enables safe communication in the workplace without having to remove the hearing protection. Furthermore, the volume is factory-limited to 82dB ensuring that listening to music, podcasts, audiobooks or phone calls remain at safe levels. Plus, our device is equipped with Hear-Through technology that continues to protect the wearer's hearing while letting in surrounding sounds.

A SUSTAINABLE SOUND

The Impact In-Ear PRO not only helps increase worker safety, but it also helps reduce waste with its environmentally friendly packaging. The product's packaging is 100% plastic free and there is an option for a five-device packaging which helps customers save on cost as well as additional packaging material. Plus, the long lifetime of our Impact In-Ear PRO further reduces waste production.

A VALUABLE SOUND

An excellent price-performance ratio, outstanding benefits and unique features make the Impact In-Ear PRO product a best-in-class hearing protection solution. Our headset provides enhanced situational awareness while delivering high in-ear attenuation levels and full-connectivity Bluetooth® 5.0 at a competitive price point. Plus, given their high build quality, users only need to replace earplugs after every four weeks of use.

A SITUATION-ADAPTABLE SOUND

Available colors for the Impact In-Ear PRO are orange for environments that require higher visibility, black for general use and blue for the Food and Beverage industry where hearing protection has to be easily detectable if it happens to fall in the product. In addition, the blue detectable version features a metallic ring in the plug and a metallic clip to fix it on the wearer's clothing. All these features enable the employee to be optimally protected in almost any work and noise environment.

Impact In-Ear PRO, Orange

Impact In-Ear PRO, Black

Impact In-Ear PRO, Blue

DESIGNED FOR PROTECTION, BUILT FOR COMFORT

As is the case with all our personal protective equipment (PPE), the Impact In-Ear PRO is the result of Honeywell's commitment to innovation, continuous technological improvement and listening to feedback from our customers. Combining research insights, advanced materials, an ergonomic design, safety best practices and the input of our customers, the Impact In-Ear PRO has unique features which help to protect workers' hearing while enhancing their situational awareness and productivity.

MAIN FEATURES AND BENEFITS

- EN 352-2:2020; EN 352-7:2020; EN 352-9:2020; EN 352-10:2020 certified, SNR 30dB noise-reduction rating
- Active Hear-Through amplifies surrounding sounds up to 82dB
- Hear crucial commands and environmental sounds
- Optimized frequency attack times of 70ms (standard is 90ms)
- Industry-leading attenuation levels of SNR 30dB
- Three different colors for improved detectability
- The blue Food and Beverage detectable version features a metallic ring in the plug and a metallic clip to fix it on the wearer's clothing
- Compact travel case with a variety of earplug sizes
- USB-C rechargeable lithium battery
- Flexible, moldable ear hook
- Great for all industries, particularly where situational awareness and communication are critical
