

AUTOMOTIVE MANUFACTURING SAFETY SOLUTIONS

Helping to protect workers when and where they need it most.

During 2019, almost one third (31.4 %) of all non-fatal accidents at work in the EU took place on industrial sites.¹ Eliminating or substituting hazards, isolating workers from injury risks or changing the way people work helps build a culture of safety. But when it's not possible to engineer out the jobsite risks, personal protective equipment (PPE) plays an important role in helping ensure all workers have a future of their own.

WHY HONEYWELL?

At Honeywell, safety is in our DNA. For decades, we've created head-to-toe PPE designed to help protect the lives of 500 million workers every day. We engineer color-coded hand protection for easy selection, adjustable eye and face solutions and personalized hearing protection. We also provide ergonomic fall protection, beyond-compliant respiratory solutions and comfortable foot protection.

As environments change and new worker needs emerge, Honeywell continues to innovate for a safer future. With our legacy as an expert in worker protection, you can rely on Honeywell for peace of mind in helping provide all workers the safety they need.

WHY PERSONAL PROTECTIVE EQUIPMENT MATTERS

Automotive manufacturing jobsites present many hazards as workers operate heavy machinery, handle sharp metal sheets, weld together metals, assemble interiors, inspect for quality assurance and more.

244

fatalities in the manufacturing industry in 2019²

586,905

reported injuries in manufacturing industry in 2019³

13.8

million Europeans work in automotive in 2020⁴

28.6%

of non-fatal accidents at work in 2019 occurred while involved in production, manufacturing, processing or storing⁵
