

HONEYWELL NORTH™ PRIMAIR® PAPR FAMILY

Honeywell
NORTH®

RESPIRATORY PROTECTION THAT GOES BEYOND COMPLIANCE

As a global leader in personal protection equipment (PPE) for decades, Honeywell's top priority has always been worker safety. Our range of disposable and reusable respiratory protection solutions ensure compliance, durability, comfort and enhanced work productivity. Years of respiratory research and technical development have resulted in an advanced ecosystem of Powered Air-Purifying Respirators (PAPR).

THE POWER OF HONEYWELL PAPR

With so many respirators on the market, it can be hard to know which respirator, or even which PAPR, might be right for your workers. The Honeywell North Primair PA500 and PA700 Series PAPRs are designed around comfort. The PA500 Series PAPR was designed to be compact, low-profile, comfortable and lightweight – perfect for use in particulate-only environments. The PA700 Series PAPR can be used in a variety of both particulate and gas contaminate environments and stands out in 3 key areas: comfort, cleanability and battery life. Honeywell's advanced ecosystem of PAPR's allows your workers to be comfortable and breathe with ease in any environment.

PA500 SERIES PAPR

We know that when you're working long shifts, it's important to stay comfortable while staying protected against particulates. That's why the PA500 PAPR is designed with the worker in mind, with a focus on comfort, ease of use and efficiency.

PA700 SERIES PAPR

The Primair 700 (PA700) Series PAPR is Honeywell's most configurable of Powered Air Purifying respirators; a modern, easy-to-use and ergonomic system for both particulate and gas contaminants that is compatible with a wide-range of hoods, headtops, and tight-fit masks.

HONEYWELL NORTH PRIMAIR 500 SERIES

A SYSTEM WITH POWERED AIR PURIFICATION TO PROTECT AGAINST PARTICULATES

The Honeywell North PA500 series comprises lightweight powered air purifying respirators that filter particles only. The series has been designed around three basic principles: comfort, ease of use and efficiency.

EASE OF USE

Ultra-slim and lightweight
– ideal for long shifts and
working in tight spaces

BATTERY PLACEMENT

Protected on five sides to prevent
accidental disconnection.

COMFORT

Well-balanced design
reduces back strain and
increases freedom of
movement

1 SELECT YOUR HEADGEAR

Choice of headgear may depend on the Assigned Protection Factor needed.

PA500 APPROVED HEADPIECES

PA900 HEADGEAR RANGE (includes PA032 breathing tube)

PA911EU
Head cap
+ face seal

PA921EU
Hard hat
+ face seal

PA921DSEU
Hard hat + short
disposable shroud

PA921DLEU
Hard hat + long
disposable shroud

PA922EU
Hard hat +
standard shroud

PA923EU
Hard hat +
premium shroud

LIGHTWEIGHT HEADGEAR

PA800 WELDING HELMETS

PA810EU
Welding headgear

PA811EU
Welding headgear
with hard hat

	PRIMAIR™ VL	PRIMAIR™ PLUS	PA800	PA900
Classification	TH3	TH3	TH2 for PA810 EU (TH3 for PA811EU)	TH3
NPF	500	500	50 for PA810 EU (500 for PA811EU)	500

2 SELECT YOUR BREATHING TUBE

Our breathing tubes offer simple twist and lock connectors, lightweight and highly flexible hose material and they are easy to clean.

BREATHING TUBES

PA031

86-cm short tube
(lightweight headgear)

PA031L

100-cm long tube
(lightweight and
PA800 headgear)

PA032

36-cm long tube
(PA900 headgear)

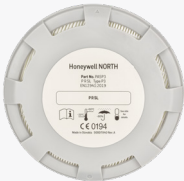

PA036

119-cm extra-long tube
(PA800 headgear)

3 SELECT YOUR FILTER

Filters and cartridges help protect against dust and particulates. A filter cover can be used on top of the filter or cartridge.

PRODUCT	SKU	NAME/DESCRIPTION	PRODUCT	SKU	NAME/DESCRIPTION
	PA5P	P3 - filters (pack of 5 filters)		PA5PR	Prefilter (pack of 10)

4 SELECT YOUR BLOWER ASSEMBLY

A blower draws contaminated air through the filter cartridge and pushes a continuous, steady flow of clean air to the user. All kits come with a nylon or decontamination belt, battery, charger and blower. If a backpack configuration is preferred, the backpack adapter can be purchased separately.

BELT-MOUNTED ASSEMBLY

Belt options include nylon (PA551), decontamination (PA551D) and welding (PA551W) depending on hazards and specific application needs.

OPTIONAL BACKPACK ADAPTER

As an alternative to belt-mounted assembly, workers can choose to wear their PAPR with a backpack adapter.

HONEYWELL NORTH PRIMAIR 700 SERIES

WORK HARD. BREATHE WITH EASE.

For the worker who uses a PAPR daily, the Honeywell North PA700 Series makes it easy. The integrated system is streamlined, easy to use, and quick to assemble. With components that lock into place, workers can get on the job quickly and feel safer. Plus, the ergonomic design keeps them comfortable during long shifts, which maximizes productivity.

COMFORT

Comfort padding on belt and backpack increases comfort for the wearer

BATTERY LIFE

12+ hr. battery life* means you don't have to switch battery out during the course of a shift

**Typical expectations based on laboratory testing. Actual battery run time and battery service life is dependent on many factors including working environment, charging conditions, filter cartridge type and headpiece type.*

CLEANABILITY

Cartridge cover wipes clean easily. Great Ingress Protection (IP) Rating, which measures sealing effectiveness against dust or liquids.

long tube (PA800
headgear)

3 SELECT YOUR FILTER OR CARTRIDGE

Filters and cartridges help protect against dust, particulates, and certain gases and vapors. A filter cover can be used on top of any filter or cartridge for added protection and is easy to wipe clean.

PRODUCT	SKU	NAME/DESCRIPTION	PRODUCT	SKU	NAME/DESCRIPTION
	PA7P	P3 PARTICULATE FILTER		PA7PR	PRE-FILTER Pre-filter for PA7P P3 Particulate Filter
	PA7A2P	A2P3 COMBINED FILTER		PA71A1*	FILTER COVER (SMALL) Cartridge cover, Small, for PA7P
	PA7ABEK1P	ABEK1P3 COMBINED FILTER		PA71A2*	FILTER COVER (MEDIUM) Cartridge cover, Medium, for PA7A2P, PA7ABEK1P

*As shown is installed on blower unit.

A	Organic gases and vapours, for which the boiling point is above 65 °C. For example: solvents, hydrocarbons etc.
B	Inorganic gases and vapour, e.g. chlorine, cyanide, formaldehyde, hydrochloric acid, etc.
E	Acid gases and vapour, e.g. sulphur dioxide, ect.
K	Ammonia and organic amino derivatives
P	Particles, dust

4 SELECT YOUR BLOWER ASSEMBLY

A blower draws contaminated air through the filter cartridge and pushes a continuous, steady flow of clean air to the user. All kits come with a nylon or decontamination belt, battery, charger and blower. If a backpack configuration is preferred, the backpack adapter can be purchased separately.

BELT-MOUNTED ASSEMBLY

Belt options include nylon (PA751), decontamination (PA751D) and welding (PA751W) depending on hazards and specific application needs.

OPTIONAL BACKPACK ADAPTER

As an alternative to belt-mounted assembly, workers can choose to wear their PAPR with a backpack adapter. This requires a shorter breathing tube (PA033).
