

The More You Train, The More You Gain

Safety doesn't happen all by itself. Training is an essential part of maintaining a safe and productive work environment, and it helps organizations and their workers maintain compliance on the job, increase hazard awareness, and boost their self-confidence.

To achieve the highest levels of safety, it takes smart preparation, quality equipment, and a well-trained workforce.

Honeywell
THE POWER OF **CONNECTED**

At Honeywell, we're dedicated to helping you build a Culture of Safety with comprehensive training that leverages best practices and is tailored to the needs of your workforce. With that in mind, we have designed and developed the Honeywell Houston Training Gym and Customer Experience Center (CEC).

A World-Class Center from a World Leader in Safety Solutions

The 10,000 square foot world-class Honeywell Training Gym and CEC offers an immersive experience that enables customers to interact and collaborate on the development of the next generation of Honeywell PPE, gas, fire, and smoke detection solutions. Our facility offers on-site programs, online resources, and certified training sessions for hands-on experience.

Industrial workforces, partner organizations and customers will benefit from the use of replicated industry applications, including specially designed catwalks, pipe rack, climbing pole, confined tank and simulator, a drilling tower, training tower, ladder rescue simulator, as well as a wind simulator.
